Rector's Foreword

"At Opole University we teach thinking." This motto merges the universal academic traditions of our university as treasury of knowledge, anchor of civilization, and institution of higher education, with the requirements of the present. Today one has to think quickly, clearly, and efficiently to fully understand the ever-changing nature of the world, and crucially, to have an advantageous influence within it.

In this current "liquid modernity" – to use a term coined by a classic text of sociology – technologies, means of communication, lifestyles, habits, fashion, and entertainment change in revolutionary and unpredictable ways. Everything changes. Everything, but one. The fact is that the ultimate answer to the new challenges that the world throws at us, is thinking. Critical judgement, objective distance, depth of thought, and the imperative to seek out the best solutions – this is exactly what Opole University teaches.

This contention is proven not only by our titled academics, but also by the tremendous successes of our graduates. And what abundant good company they make! You'll find among them the most excellent scientists, scholars, businesspeople, lawyers, artists, teachers, journalists, and politicians. Fate has scattered them across Poland and the whole world, where they perform their roles brilliantly. It is uplifting and encouraging that the foundation upon which they have built their careers and indeed lives, is the knowledge and skills they have gained at our University.

Regardless of why you are reading this short publication – a desire to study here, engage in scientific cooperation or business interests – let these words be your invitation to the humble abode of our university.

"At Opole University we teach thinking."

The City of Opole

Opole is a vibrant city in southwest Poland. As the capital of the smallest voivodeship (province) of Poland, Opole has the largest ratio of students to citizens in the whole of the country, a fact that truly makes it an academic centre with a unique atmosphere – you can find student culture and entertainment everywhere. Along with the calm and captivating character of the city, verdant surroundings, and a successful mixture of old and modern architecture, Opole offers space for both fun and reflection.

In comparison to other university towns, cities, and metropolises, where the cost of living and transportation are often high, Opole is considerably less expensive. This is not solely due to low prices for goods, but also the fact that everything of interest is usually within walking distance, and even closer if you make use of the publicly available bikes. But then again, places of interest are not the only local. Opole is conveniently situated between the bigger cities of Wrocław, with its international atmosphere, industrial Katowice, and the traditionally Catholic Częstochowa.

Our city has a prestigious reputation as being the “Capital of Polish Song” – where the National Festival of Polish Song is held annually at the Opole Amphitheatre, along with the Opole Confrontation Theatre, organized by Jan Kochanowski Theatre. For those seeking refuge from everyday life, Opole offers relaxing afternoons in the enchanting park on Bolko Island, which boasts one of the most beautiful zoos in Poland, and walks on the boulevards along the Młynówka Canal, which is an integral part of the so-called “Venetian Opole.” Our city also features numerous swimming pools, fitness centres, and gyms.

Faculties at Opole University

Faculty of Economics

The Faculty of Economics employs a highly-qualified staff of academics who have taught and conducted research in a variety of economic fields of expertise for years. The most measurable proof of the quality and level of our current research is the ever-growing number of citations in specialized literature on the subject. Students of our faculty gain the necessary theoretical and practical knowledge to successfully assess and analyze both micro- and macro-economic phenomena in the market, and easily adjust to changing circumstances. Therefore after graduation they easily find managerial and administrative jobs.

The faculty offers four Bachelor's and Master's Programmes and several specializations within the subjects of Economics, Logistics, Spatial Economics (engineering degree), and Management.

The faculty is more than ready to accept foreign students. Not only is our website fully translated into English, but some of our courses are held in English, and we also have a variety of English titles in our library and databases. As well, foreign academics regularly give lectures here. Communicating with our friendly and helpful staff is easy, as all of them speak English very well.

We are extremely proud of our students, who form different study groups and use their acquired knowledge in practice not only after they graduate, but also during their studies. It is due to our students' inventive minds and their initiative that Opole now has a system of easy-to-rent, publicly available bicycles. Our students have also won a competition for the best spatial management project on the University campus.

www.ekon.uni.opole.pl

www.facebook.com/wydzialekonomiczny

address: ul. Ozimska 46a 45 - 058 Opole

Faculty of Theology

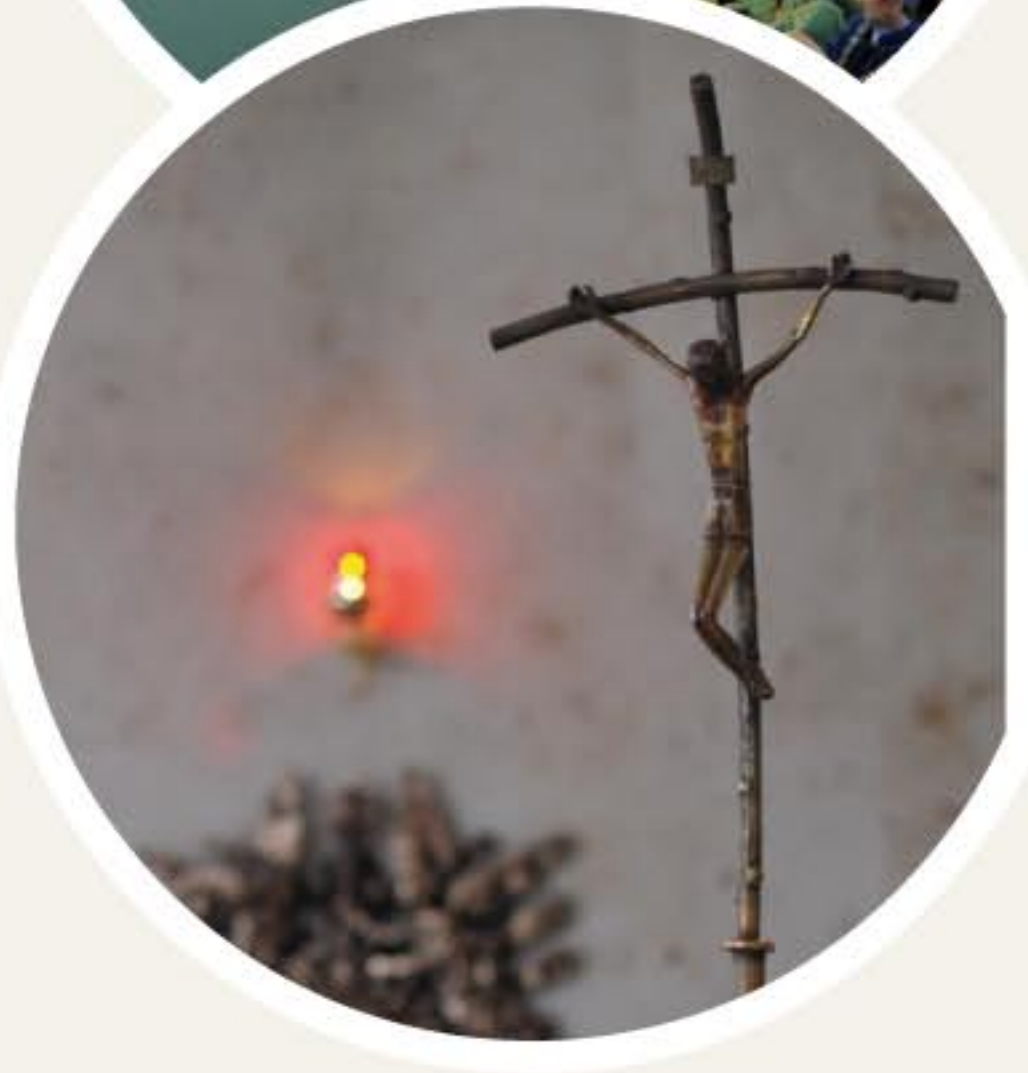

The Faculty of Theology is in the top twenty five faculties at Polish universities. We educate new priests, catechists, social workers, musicologists, and cultural scholars. Our students may also focus on religious art and music. The faculty closely cooperates with many academic institutions in Europe and the USA, and is a prominent member of the International Federation of Catholic Universities.

The faculty offers both secular and clerical studies within Bachelor's and Master's Programs in Theology; Family Studies; Musicology; and Mediterranean Culture. We offer doctoral (Ph.D.) studies in Theology, as well.

Our long-term relationships with academic institutions from other countries demonstrate that we have the experience, proficiency, and efficiency needed for such cooperative efforts. We accept foreign students and teachers alike, we organize youth exchanges between our and foreign countries, and we enjoy international and interfaith dialogues on theological subjects.

We are tremendously proud of our library, which not only contains a rich collection of scholarly texts, but also a collection of old prints from the fifteenth and sixteenth centuries. Our students can also make use of our professional gymnasium, computer rooms, and musical instruments and equipment for those who want to delve deeper into musicology.

Our student study groups are very active and do research on cultural heritage of our region, for example by cataloguing its cultural and religious monuments. The University Chaplaincy Centre, Ressurexit, on the other hand, organizes concerts, meetings, and various religious and cultural events, in which every student can freely participate.

www.wt.uni.opole.pl
www.twitter.com/wt_uo
address: ul. Drzymały 1a 45 - 342 Opole

Faculty of Law and Administration

The Faculty of Law and Administration is one of the youngest in our country. Combining theoretical and practical knowledge with a friendly atmosphere, the faculty helps future lawyers, negotiators, advisors, and internal security administration officers gain the necessary skills to serve our country and face contemporary challenges. The faculty is located in a newly renovated building at the very centre of our campus.

The faculty offers both Bachelor's and Master's programs in Administration; Law; and Internal Security. We offer doctoral (Ph.D.) studies in Law, as well.

We cooperate with a variety of higher education and administrative institutions, both national and international, as well as local government, justice, and prosecution units, where our students carry out their internships or participate in training sessions. Such initiatives require a good command of foreign languages, and that is why we provide a choice of courses in English that include Arts Law, Sports Law, and European Consumer Law.

We are very proud of our own court room, where our students can simulate and participate in court cases – civil, penal, and administrative – under the supervision of appropriate academics. Thanks to our Full European Documentation Centre our students are also able to access any and all European documents they need for their scholarly pursuits.

www.prawo.uni.opole.pl

address: ul. Katowicka 87a 45-060 Opole

Faculty of Natural and Technical Sciences

The Faculty of Natural and Technical Sciences teaches our students everything that they need to know about the following subjects: natural and environmental science, paleobiology, genetics, and bioinformatics. The faculty's involvement has been crucial in establishing an academic oversight for the paleontological site in Krasiejów, whose famous Dinopark now compliments the area where unique fossils of Triassic dinosaurs have been excavated. Research conducted at the faculty includes environmental engineering, landscape architecture, and even digital image processing engineering.

The faculty offers Bachelor's and Master's Programs and several specializations within the subjects of Landscape Architecture, Biology, Biotechnology, Technical and Information Education, Environmental Engineering, Environmental Protection, Nature Studies, and Renewable Energy Sources. The latter is the newest program at our faculty and we are excited to offer it to you. We offer doctoral (Ph.D.) studies in Biology.

We have considerable experience in what we teach, especially as our environmental protection program is the oldest one in the country. We concentrate on giving our students practical knowledge for use later in life. We are able to do so with the extensive use of our modern technological equipment and a variety of laboratories that include our own genetics lab, and those reserved for cosmetic and food biotechnology.

We are very proud of the Krasiejów paleontological site and the ornithological site in Turawa. Both of them are available to students if they choose to do research on the subjects.

www.wpt.uni.opole.pl
address: ul. Oleska 48 45-052 Opole

Faculty of History and Pedagogy

The Faculty of History and Pedagogy is definitely the largest faculty at our university. It consists of eight institutes, boasts more than two hundred employees, and more than five and a half thousand students. The faculty is known for its international cooperation, the most recent example being the Europa Master trinational MA program in European Studies between Poland, France, and Germany, which was an initiative by the Institute of Political Science.

The faculty offers Bachelor's and Master's Programs in fourteen subjects – including Journalism, Art, Philosophy, Cultural Heritage Preservation, Pedagogy, Psychology, Political Sciences, Sociology, Social Work, International Relations, and Knowledge Management and Information Brokering – most of which have at least several specializations to choose from. We offer doctoral (Ph.D.) studies in History, Pedagogy, Philosophy, and Political Sciences.

All of our Institutes are very welcoming to foreign students and we try our best to make them feel at home. Each Institute has something unique that makes it a perfect choice for you, if you intend to study with us.

We are proud of the activities and projects of our units. For example, the Institute of History is the only one in Poland where you can study Biography Studies, and it also organizes studies at international archaeological sites. The Institute of Philosophy is internationally renowned for their American & European Values conferences and the Institute of Art owns magnificent art studios. Students of the Institute of Pedagogical Sciences often help third sector institutions voluntarily and the Institute of Sociology has prepared an incredible website – www.hello.uni.opole.pl – for foreign students, which you may find very useful!

www.whp.uni.opole.pl

address: ul. Oleska 48 45-052 Opole

Faculty of Philology

The Faculty of Philology mixes tradition with modern and creative ways of teaching in a friendly, nurturing academic environment. Our highly-qualified staff of professors, habilitated doctors, doctors, and assistants bring our students to the heights of philological knowledge, making our faculty one of the best in the whole country.

The faculty offers studies in English, German, Romance, East Slavic, and Polish languages, matching them with the appropriate Culture Studies of the chosen languages and their respective countries. Students can specialize in linguistics, applied linguistics, literature, and culture. We offer doctoral (Ph.D.) studies in those subjects, as well.

The students in our Institutes are very competent in multilingualism, and they are ready for contact with multicultural environments. Very often they help foreign students as mentors, but also as teachers, too. They work with, for instance, children in local orphanages out of a sense of societal duty. Their extensive knowledge is also used in enterprise cooperation exchanges, organized in the Opole region, where they serve as translators and interpreters. This is also one of the reasons our students are sought after by different companies and enterprises when they graduate.

We are proud that our students can fulfil their passions actively thanks to our technical background, such as our ultramodern recording and TV studios. Our students also act in theatrical plays along with some of our lecturers. Their skills allow them to be “academic ambassadors” for the countries they study. Finally, they are very good at working with various kinds of cultural and media texts – they are truly philologists of the Web 2.0 age.

www.wfil.uni.opole.pl

address: pl. Kopernika 11 45-040 Opole

Faculty of Chemistry:

The study of Chemistry at Opole University (formerly the Opole Higher Pedagogical School) has taken place since 1964, as a part of Faculty of Mathematics Physics and Chemistry. In 2008 the Faculty of Chemistry was established. It is now located in one of the most recently renovated buildings at our University. Our laboratories are equipped with the newest instruments, allowing us to match international standards of quality and comfort in studying chemistry, for example by providing our students with access to specialized laboratories.

The Faculty of Chemistry offers Bachelor's and Master's Programs in Biological Chemistry, Cosmetic Chemistry, New Materials Chemistry, and New Polymeric Materials Chemistry. We offer doctoral (Ph.D.) studies in Chemistry, as well.

Our faculty acknowledges the fact that a modern scientist needs to know foreign languages and that is why our students attend an obligatory course in Chemistry English. Our MSc and Ph.D. seminars are taught in English, and the literature we use is also primarily in this language. We regularly invite foreign lecturers and teachers to visit us and we encourage our students to participate in a variety of exchange programs.

We are incredibly proud of our state-of-the-art equipment, which is available to our entire staff and students alike. We are aware that reliable research results and experiments depend on the newest technology available, and we provide them with gas and liquid chromatographs featuring various types of detectors, capillary electrophoresis instruments, NMR, FTIR, NIR, UVVis, Mass spectrometers, Xenotest, and others. Our students often participate in projects and grants funded by the Polish Government and the EU, and do research for companies.

www.chemia.uni.opole.pl
address: ul. Oleska 48 45-052 Opole

Faculty of Mathematics, Physics and Computer Science

The Faculty of Mathematics, Physics and Computer Science offers studies for students that have a wide range of plans for the future – from IT to finance, from insurance companies and even medicine. The definite advantage of the faculty is its highly-qualified staff of experts and constantly developing and modernized technical base, including the faculty's own astronomical observatory.

The faculty offers Bachelor's and Master's Programs and several specializations within the subjects of Mathematics, Physics, and Information Technology, the latter being available in the Engineering Degree Program, as well. We offer doctoral (Ph.D.) studies in Physics and Mathematics.

There are several courses held in English within the scope of CISO, Microsoft ITA, and RedHat academies. Individual consultations in English are possible. Skills acquired during those academies can be tested or practiced in two complete net labs for 16 people, which are based on CISCO devices. We also use LEGO Mindstorms sets in teaching.

Our students actively participate in the meetings of Student Science Groups that deal with the issues of the three disciplines mentioned. Young physicists visit schools and make fascinating natural science presentations. Those students who need to are also able to use two virtualization servers, provided by our faculty for individual and group projects.

address: ul. Oleska 48 45 - 058 Opole

Studying at our University

Those interested in studying at Opole University may do so by contacting their university's International Office and applying for the ERASMUS Programme.

There are several procedures you need to follow, so we'll provide you with this short guide that may also serve as a reminder.

What to do before arriving at Opole University

FIRST: Let us get to know you!

Send an application form to the International Office at Opole University. You can find it (and additional information) on our website: www.erasmus.uni.opole.pl

Please remember that you have to fill it out on your computer. You must also enclose other required documents, such as the Learning Agreement, and send all of the documents via normal post to:

Opole University Office for Scientific Research and International Relations

Plac Kopernika 11A , 45-040 Opole, Poland
phone: +48 77 541 59 75
e-mail: erasmus@uni.opole.pl

The application deadlines at Opole University are:

- June 15 for Fall semesters;
- December 15 for Spring semesters.

Once the Erasmus Coordinator accepts your application, you will be sent a Letter of Acceptance, which might be required if you also apply for a visa.

SECOND: Find yourself a place to live!

You might want to find a flat in advance, but the easiest way is to apply for accommodation at one of our dormitories. Once again, the application form can be found on our website and the deadlines are exactly the same.

THIRD: Make sure you have insurance!

If you are an EU/EEA citizen you need to apply for the European Health Insurance Card (EHIC), which – in case of illness or accident – you need to show to your doctor along with an ID card, passport, etc. This will provide you with free health care in our country.

If you come from a country that is not a member of EU/EEA, you need to purchase health insurance before departure. Unfortunately, you will have to pay for medical consultation, but the costs will be paid back by your health insurance company afterwards.

FOURTH: Complete the official paperwork!

Members of the EU/EEA have it a bit easier at start. You just need a valid passport (or ID) card to enter and reside in Poland for up to three months. If you need to stay longer than that, you need to apply for a Temporary Residence Permit at the Regional Office in Opole. Don't worry, we will help you with that!

Non-EU/EA citizens have a bit more paperwork to do before they arrive in Poland. Why? Because you will probably need a visa (it depends on your country, so you have to check beforehand). Short-term visas allow to stay in Poland for up to three months, long-term visas – up to a year. Make sure you apply for the right one. Students who received their visa do not need to apply for temporary residence as described in the previous paragraph.

What to do upon arrival at Opole University?

FIRST: Check in!

When you arrive in Opole, find your way to the dormitory assigned to you and check in, so that you can leave your luggage in your room.

Very often our students offer to help foreign students with their first steps, but you have to contact them yourself at: **buddy.uo@gmail.com** . You can even arrange that they will meet you at the station!

SECOND: Let us know you are here!

Come to our office and tell us you have arrived. It is common practice nowadays that you will need our confirmation of your arrival slip sent to your home university.

THIRD: Agree to the Learning Agreement!

Contact the corresponding Faculty Coordinator at Opole University and determine the final details of your study program. If there are any changes to what you expected to study here, make sure you consult them and let your home university know.

FOURTH: Have a bit of fun with us!

Attend our meetings and participate in the activities we have prepared for you as a part of the Orientation Week. We will show you around our University and its vicinity, tell you a bit about Poland, and answer all of your questions.

FIFTH: Pick up some of the language!

Ask about our free Polish Language courses. They take two months to complete and they introduce you to the very basics of Polish language, which might prove helpful in everyday situations.

What to do at the end of your stay at Opole University?

FIRST: Receive your credits!

After you take all of your exams, contact your Coordinator and ask them for your Transcript of Records. It contains all of the credits for the courses you have taken.

SECOND: Visit... everyone!

You will also receive something called the "Karta Obiegowa" – a clearance slip that has to be signed by the majority of our offices, such as the library, your dormitory, and the dean's office (where you will have to leave your student ID). It will confirm that you have no formal dues at Opole University and can officially leave.

THIRD: Give those to us!

When you have both of the documents completed, make a copy of each and bring it to our International Relations Office. When you give them to us, we will give you a Confirmation of Study Period slip – a document that confirms that you have studied at our University. You will need it when you get back to your home university.

Living in Opole

Accommodation at Opole University

Those who apply for accommodation at our campus will be assigned to either the "Niechcic" or "Kmicic" dormitories. Both offer double or triple rooms (no singles, sorry!) with a shared bathroom and kitchen. The approximate price is 350 zlotys (about 85 euro) per month, including rent, utilities, internet, etc.

All rooms are furnished with everything for a comfortable stay, including internet access and cable TV. You will not be able to use Wi-Fi before you get your student ID (it may take up to 3 weeks), so remember to bring your own Ethernet cable!

There is a fridge and an oven in the kitchen, so you can prepare your own food. The bathroom has a shower, and washing machines are in a separate room on each floor. The dormitory does not provide irons or hair dryers. You need to bring them yourself or buy them here.

Unfortunately, the dormitory does not have a canteen that serves meals. You need to buy your own food, which you can keep and prepare in the kitchen in your room.

Shopping in Opole

Most European countries use the Euro as their currency. Poland has its own currency – Polish Złoty. The going exchange rate is:

1 Euro ≈ 4 Złotys

You are probably wondering about the prices of some of the most common products in our country. Have a look at the list below!

Tea
Herbata
≈ 0,5 Euros

Fruit / kg
Owoce
≈ 1 - 2 Euros

Bottle of water
Butelka wody
≈ 0,5 Euros

Coffee
Kawa
≈ 1,5 Euros

Bread
Chleb
≈ 0,5 - 2 Euros

Cheese / 200g
Ser
≈ 1,5 Euros

Beer
Piwo
≈ 2 Euros

Vegetables / kg
Warzywa
≈ 1 - 2 Euros

Ham / 200g
Szywnka
≈ 1,5 Euros

Hairdresser
Fryzjer
≈ 5-10 Euros

Pizza
≈ 5 - 10 Euros

Cinema ticket
Bilet do kina
≈ 5 Euros

Gym/month
Siłownia
≈ 15 Euros

Bus ticket
Bilet autobusowy
≈ 0,30 Euros

Dormitory
Akademik
≈ 85 Euros

Cultural Life and Leisure Time

Although Opole is not a metropolis, it does not lack places to go or visit when you have some spare time at your hands. There are parks to relax in, pubs and clubs to party at, museums to visit, cinemas to attend, and theatres and concerts to enjoy.

Cafés and restaurants

In Opole you can experience a variety of cuisines – you will find establishments that offer Italian, Turkish, Japanese, American, and of course, traditional Polish fare. In addition to high-standard, expensive restaurants, the city boasts many smaller cafés that offer a more private atmosphere, not to mention ice-cream parlours and even tea rooms. Everything is within reach, especially if you live near the city centre.

Recreation

If you are looking for a more active afternoon, you will find it at one of the gyms or swimming pools in Opole. There are several fitness centres to choose from, and we also have an urban bicycle system that allows you to rent bikes (free of charge for up to twenty minutes) and have a nice ride around the city!

ul. Barlickiego 13

Theatres and Cinemas

The repertoire in Opole ranges from the classical to more modern and contemporary dramas. Every year scores of people attend performances at the Jan Kochanowski Theatre, where the best acting troupes compete against in the dramatic Confrontation Theatre competition. A different kind of drama is offered by the Alojzy Smolka Puppet and Actor Theatre, where actors animate an incredible collection of puppets. Don't let this deceive you, however. The plays are for both children and adults. Finally, Helios 3D Cinema screens an international selection of films on a regular basis.

pl. Kopernika 17
- ♦ **Alojzy Smolka Puppet and Actor Theatre**
ul. Kośnego 2a

Music

Concerts are frequent in our city due to the fact that Opole is the "Capital of Polish Song." Our modern amphitheatre and philharmonic concert hall present a mix of classical and contemporary music, which means that fans of different musical styles can always find something interesting.

- ♦ **Opole Amphitheatre**

Students' Culture Centre

The Students' Culture Centre is the place you want to go to, if you feel artistic and creative, or if you want to attend cultural events made especially for our students. Thanks to the great technical background, along with theatre and dancing halls, the Centre organizes concerts, plays, film projections and various exhibitions of art – all of this for free! It also serves as the headquarters of our university's radio "Sygnały", led by students interested in journalism and broadcasting media.

- ♦ **Students' Culture Centre**
ul. Katowicka 95

Museums and Galleries

The Museum of Opolan Silesia and the Open-air Museum of Rural Architecture offer a very good overview of how the city and the region around it have evolved throughout the years, as well as more detailed historical information for those interested. You will also be able to find several art galleries near the city centre that offer a wide range of exhibitions.
